

Escalators and Revolving Doors Policy for Guiding Eyes Pups

Pups on program should **never** use an escalator or revolving doors.

Teaching the safe use needs to be done by our professional guide dog instructors.

Due to the potential danger of escalators and revolving doors, it would be easy for pups to get hurt.

A pup's toes can easily get caught in an escalator and in the tight space of a revolving door, there is the serious potential of the pup getting stuck or pinched.
